

"Wheel" Instructions

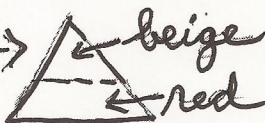

1. Cut two 7" squares (one dark blue and one beige). Stack one on top of the other and cut both directions diagonally. Sew one blue to one beige to make a "sail" with the blue always on the right of finished side. Finish three more units.

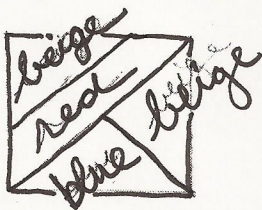

2. Cut two 6 1/2" squares (red). Then stack and cut once diagonally. Place triangle or pyramid with the longest side toward you and measure 2 1/2" up from the base and cut off the top and discard. Remainder is trapezoid.

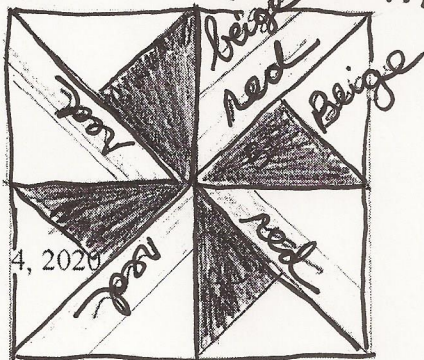

3. Cut two 3 3/4" squares of beige. Stack and cut diagonally once. Sew a beige triangle to the top of the red trapezoid. (Beige may be a little large; center the pieces and trim off excess later.)

4. Assemble two pieces into small square, "sail" attached to bottom of red. Finish three more units.

5. Assemble 4 units into large square, being careful to lay spokes going around the square. Follow diagram. The raw square size is 11 3/4"

Due Feb. 4, 2020
